01 Features Overview

25 Animated Crosshairs

Choose from 25 premium crosshair designs spread across three rarity tiers, each with a dynamic center-dot color, adjustable scale, and adjustable stroke thickness. Every crosshair floats as an overlay above any game.

TIER	DESIGNS
PRO	Dot, Cross, T-Shape, Circle, Neon Acid Cross
LEGENDARY	Cyber V-Wing, Valkyrie Wings, Blood Moon Star, Apex Mech Frame, Sniper HUD Grid, Red Laser Scope, Apex Cyber Wing, Tactical Jet HUD
MYTHIC	Infernal Crown, Celestial Sun, Demon Tribal, Solar Eclipse Flame, Golden Blaze Horns, Plasma Lightning, Infernal Demon Crown, Angelic Wing Crown, AK117 Grim Edition, Mythic USS9, Mythic USS9 v2, Mythic AK117 v2

Customization: dynamic center dot color • scale size 10–60dp • stroke thickness 1–12dp • floating overlay above any game

DNS Accelerator

Speeds up server hostname lookups using Cloudflare (1.1.1.1), Google (8.8.8.8), and OpenDNS.

- ◆ Faster game server connection
- ◆ Bypasses ISP restrictions (works with Zong for CODM)
- ◆ One-tap activation

Real-Time Ping Measurement

See your actual ping to game servers, updated every 2–3 seconds.

Headshot Calibration

Fine-tune aim sensitivity with adjustable sliders and switches:

- ◆ Long-Range — 110% default
- ◆ Close-Range — 150% default

Free Fire Auto-Rotate

Forces landscape mode on both sides for Free Fire. Requires the "Modify system settings" permission (one-time grant).

Max Refresh Rate

Forces your display to its highest supported refresh rate.

Color Enhancement

Boosts screen colors for better visibility — makes enemies easier to spot in dark areas.

Gaming DND

Mutes all notifications and calls during gaming for zero interruptions.

Animation Speed (ADB)

Doubles animation speed for a snappier feel. Requires one-time ADB setup.

Dual-Path Mode (Premium)

Sends game packets over WiFi + Mobile simultaneously to reduce packet loss. Requires both connections active.

App Locker

Lock any app with a 4–9 digit PIN or alphanumeric password — prevents unauthorized access to your games and apps.

Phone Info

Shows device specs: model, Android version, RAM, storage, and battery health.

Lower the Ping Guide

Step-by-step screenshots showing how to change your game region for better ping. Users report an **80ms → 40ms** improvement!

02 How to Activate Advanced Features

ADB Setup — Animation Speed + Color Enhancement

- 1 Download ADB Platform Tools**
developer.android.com/studio/releases/platform-tools
- 2 Enable USB Debugging on your phone**
Settings → Developer Options → USB Debugging → ON. (If Developer Options is hidden: Settings → About Phone → tap Build Number 7 times.)
- 3 Connect phone to PC via USB**
Tap "Allow USB debugging" on your phone when prompted.
- 4 Open Command Prompt in the platform-tools folder**
Click the address bar, type cmd, then press Enter.
- 5 Test the connection**

```
adb devices
```

You should see your phone listed.
- 6 Grant the permission**

```
adb shell pm grant com.aistudio.elitebooster.muhammadnabeel  
android.permission.WRITE_SECURE_SETTINGS
```
- 7 Finish in-app**
Go back to Alpha Optimizer → tap "I COMPLETED THE SETUP — CHECK NOW".

Pro Tips

- ◆ **Lower ping:** Use the “Lower the Ping” guide to change region.
- ◆ **Better aim:** Try different crosshairs for different weapons.
- ◆ **No interruptions:** Enable Gaming DND before ranked matches.
- ◆ **Smoother feel:** Enable Animation Speed (0.5x).
- ◆ **Spot enemies:** Turn on Color Enhancement for dark maps.
